

Nuova versione per Capture One

LINK (<https://www.nexthardware.com/videographia/news/visualizzazione-sviluppo/1191/nuova-versione-per-capture-one.htm>)

Capture One si aggiorna alla versione 9.2, aggiungendo il supporto a nuove fotocamere come la Pentax K-1, nuovi obiettivi e features

Phase One ha rilasciato **Capture One ver. 9.2**, aggiungendo nuovi supporti e features che elenchiamo di seguito:

Nuove fotocamere supportate

- Pentax K-1

- Nikon D500
- Canon EOS M10
- Canon G5x
- Canon G7x MKII
- Canon G9x

Nuovi obiettivi supportati

- Canon EF-S 18-135 f3.5-5.6 IS USM
- Sony FE 50mm f1.8
- Sony FE 70-200mm f2.8 GM OSS
- Sony FE 28mm f2
- Sony E 35mm f1.8 OSS
- Sony 70-200mm F2.8 G SSM II
- Panasonic Lumix G Vario 14-140mm f3.5-5.6 ASPH Power
- Canon G5x fixed lens
- Canon G7x MKII fixed lens
- Canon G9x fixed lens

Nuove features

- Select and deselect primary variant
- Select previous and next "page"
- Select by same variant position
- Select from file name list
- Make album from any selection
- Batch "Create Masked Layer from Selection"
- Multi image editing roundtrip for Helicon

Miglioramenti

- Keyboard shortcuts for all cursor tools
- Minor Keyboards shortcut editor improvements
- Preference for disabling Phase One tethered support (like for other cameras)
- Better TIFF color consistency in round trip editing (what you see in Capture One looks like what you see in e.g. Photoshop)
- Improved performance on 4K/5K displays and in general when hardware acceleration is enabled
- Select usability improvements
