

Corsair Dominator GTX 2250 Mhz

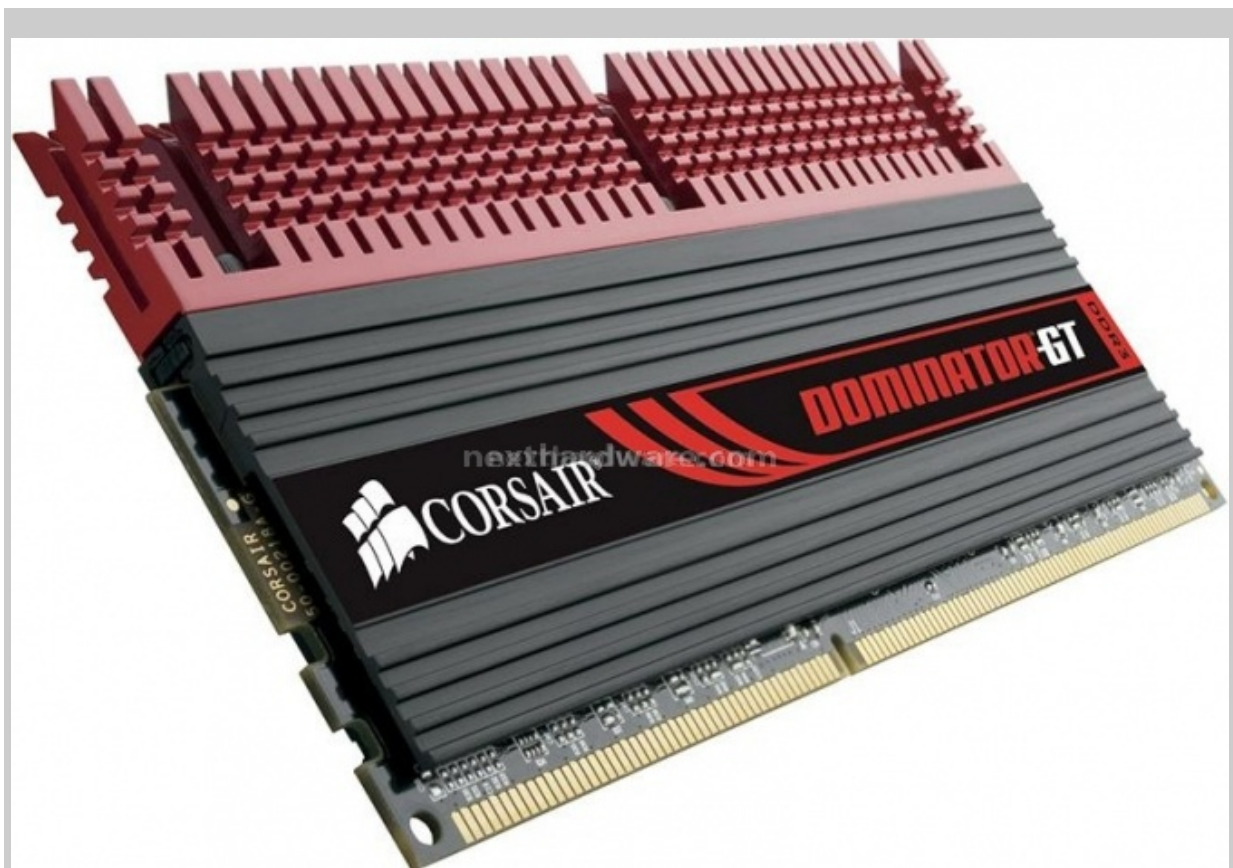

LINK (<https://www.nexthardware.com/news/ram-memorie-flash/1740/corsair-dominator-gtx-2250-mhz.htm>)

RAM DDR3 alla massima espressione.

Corsair annuncia i suoi kit DDR3 ad alte performance sia per piattaforma Intel che per AMD. Su X58 e P55 sono certificati per funzionare a ben 2250 Mhz 8-8-8-25 a 1,65 Volt in modalità single e double channel. In triple channel sono dichiarati per 2133 Mhz con i medesimi setting.

Su piattaforma AMD gli stessi moduli sono garantiti a 1800 Mhz 6-6-6-18 con 1,65 Volt.

Corsair Dominator GTX — Baseline Performance Characteristics By DDR3 Platform					
	1 DIMM	2 DIMMs	3 DIMMs	4 DIMMs	6 DIMMs
Intel X58 (Socket LGA1366) Maximum 6 DIMMs	DDR3-2250 CL8 (8-8-8-24, 1.65V)	N / A	DDR3-2133 CL8 (8-8-8-24, 1.65V)	N / A	DDR3-1800 CL6 (6-6-6-18, 1.65V)
Intel P55 (Socket LGA 1156) Maximum 4 DIMMs	DDR3-2250 CL8 (8-8-8-24, 1.65V)	DDR3-2250 CL8 (8-8-8-24, 1.65V)	N / A	DDR3-2133 CL8 (8-8-8-24, 1.65V)	N / A
AMD 790FX (Socket AM3) Maximum 4 DIMMs	DDR3-1800 CL6 (6-6-6-18, 1.65V)	DDR3-1800 CL6 (6-6-6-18, 1.65V)	N / A	DDR3-1750 CL6 (6-6-6-18, 1.65V)	N / A

1. Corsair GTX is screened and tested on Intel P55 "Lynnfield" platforms to meet DDR3-2250 8-8-8-24 specification
2. Performance characteristics by platform are based on performance and qualification tests on selected test configurations.
3. Baseline performance is not guaranteed on every motherboard brand and model of each platform.
4. Corsair GTX performance on Intel X58 chipset platforms presented in the table may not be typical.
5. Corsair Airflow is required to meet baseline performance on all platforms.
