

AMD rilascia i Performance Driver 11.11c

LINK (<https://www.nexthardware.com/news/schede-video/4174/amd-rilascia-i-performance-driver-1111c.htm>)

AMD rilascia un nuovo Hotfix dei Catalyst 11.11 che va a migliorare le prestazioni sui titoli più recenti.

AMD rilascia la versione 11.11c dei Performance Driver che migliorano le prestazioni delle Radeon HD 5000 nel gioco Elder Scrolls Skyrim.

Naturalmente i miglioramenti non sono limitati soltanto al gioco della Bethesda Softworks, ma si estendono anche ad altri titoli del momento, come potete verificare nel changelog sottostante.

↔

Elder Scrolls Skyrim

- New in Catalyst 11.11c:↔ Delivers AMD CrossfireX performance scaling for the AMD Radeon HD 5000 Series.
- Delivers AMD CrossfireX performance scaling for AMD Radeon HD 6000 Series.
- Improves performance 2-7% on single GPU configurations.
- Resolve corruption seen when enabling Multi-Sample Anti-Aliasing on the AMD Radeon HD 6970 Series.

↔

Assassin's Creed: Revelations

- ↔ New in Catalyst 11.11b:↔ Delivers AMD CrossfireX performance scaling.

↔

Batman Arkham City

- Improves DirectX 11 performance for single GPU configurations.

↔

↔ **Rage**

- Delivers AMD CrossfireX performance scaling.
- Resolves a number of image / stability issues seen with the title:↔
 - Fix geometry corruption, sometimes seen in Bash TV entrance.
 - Fix issues with Low-memory conditions on 32bit systems.
 - Fix issue with extreme corruption with missing textures on 32bit systems.
 - Fix memory leaks when deleting/reusing sync objects.
 - Fix hitching and pausing, especially noticeable on some Quad Core systems when doing races and Stanley Express runs.
 - Fix some missing shadows.

↔

↔ **Battlefield 3**

- Resolves intermittent corruption seen when playing the game at specific camera angles.
