

## GPUZ 0.1.3

**LINK (<https://www.nexthardware.com/download/diagnostiche/49/gpuz-013.htm>)**

Utility per monitorare vari parametri della VGA

Novità rispetto alla precedente versione:

- Fixed blank screen on some R5xx ASICs
- Added detection for G92 based 8800 GTS
- Fixed memory type being returned as DDR3 instead of GDDR3 on some NVIDIA GPUs
- Fixed shader count on some NVIDIA GPUs
- Added timeout to shut down when removing driver
- Fixed 2D clocks being shown on some NVIDIA cards
- Removed geometric clock delta returned as BIOS default shader clock
- NV42 AGP id F6 is now correctly detected
- Shortened High Tech Systems subvendor string to HIS
- Adjusted item tab order on Validation page
- Improved NVIDIA driver version detection on XP64
- Added support for original GeForce Quadro
- Fixed crash on some GeForce FX and earlier cards
