Futuremark introduce il Fire Strike Ultra HD

FUTUREMARK[®]
CORPORATION

LINK (<https://www.nexthardware.com/news/utilita/6437/futuremark-introduce-il-fire-strike-ultra-hd.htm>)

Con l'ultimo aggiornamento è possibile utilizzare la modalità 4K del noto benchmark.

Di seguito la lista dei miglioramenti introdotti, tra cui anche una più intuitiva e razionale interfaccia utente.

New

- Added Fire Strike Ultra, a new 4K Ultra HD benchmark test. You don't need a 4K monitor to run Fire Strike Ultra, though you will need a GPU with at least 3 GB of dedicated memory.

Improved

- New design for main benchmark selection screen.
- Improved benchmark logging to assist customer support.

Fixed

- 3DMark is now more robust when there is a problem identifying or monitoring the hardware in the system.

Professional Edition only

- You can now set command line options within .3dmdf files.
- Minor syntax changes to the .3dmdf definition files. You may need to update your existing scripts if using automation. See Command Line Guide for details.
- Added command line logging options.
- Command line progress logging now includes workload names and loop numbers.
- Removed empty log lines from command line output.
